

# THE FIRST ADVANCED COMPOSITE STRUCTURE COMPETITION

## MAKE IT COMPOSITE

July 27<sup>th</sup> - Aug 1<sup>st</sup> 2019

In order to motivate the spirit of innovation and scientific research among the engineering undergraduate students, the Egyptian Ministry of Defense - Military Technical College and the Academy of Scientific Research and Technology invite teams from Egyptian engineering faculties and research centers to compete in designing and manufacturing of advanced composite structure

The composite competition is orienting to young scholars and students. The competition aims to promote the development of composite-related industries. The competition focuses on developing the engineering thinking for composite technology among the teams

The composite competition will be held within three different levels starting from conventional composite structures passing through composite-metal hybrid structures and up to smart composite structures

ORGANIZED BY

The competition  
will be held in the  
Military Technical  
College  
Send an Email for  
competition rules

Registration  
will be through  
Email not later  
than the 1<sup>st</sup> of Jan.  
then a short course for  
composites will be held  
for compators
